

## Student Data

The information that was collected was secured in collaboration with the School District's Data Processing Department. This data is housed in a computer program (Genesis) within the District in which all schools access. The criteria for the data was submitted to a processor who in turned extracted the necessary information from Genesis. The information obtained through this collection process is used to ensure the value and success of Polk Academies. As the data proves, Polk Academy students consistently outperform District students in each of the given categories. This information is utilized as the development and implementation of current and future academies transpire.
